

MAGIC LANTERN JIGSAW PUZZLE

STILL LIFE WITH OPTICAL TOYS. Remember those wonderful old jigsaw puzzles? Their emphasis was always on the puzzle since a picture was rarely provided. All you had to go on was a title! Well, this is the very first and last NMLJ jigsaw puzzle. You will need the following: a spare journal, glue, a pair of scissors and some stiff card or plywood. Simply glue the uncut puzzle sheet to your card or wood, cut out the 48 pieces and off you go! We guarantee that the picture contains the following goodies: kaleidoscope, stereoscope, toy lantern, toy cinematograph, zoetrope, mikroskop, flick book, two zoetrope strips, one chromotrope and three strip slides. If we ever manage to re-assemble ours we will publish the completed picture in the next issue.

Happy puzzling!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
