

## THE MAGIC LANTERN WITHIN

Georg Füsslin has sent this long slide with six caricatures of dwarfs, one depicting the peepshow man (the first figure on the left). Georg says: "All the figures shown on the slide are based on the engravings from the famous book *Neueingerichtetes Zwergekabinett* by Elias Baeck published in 1720 (see the page, right). However I think the slide is from the end of the 18th century."

Do keep sending in images of any slides you have that depict magic lanterns, magic lanternists, peepshows and peepshow people. We have already published some wonderful examples but there are more.
